Sending a message to Ringtail Legal using AccuRoute Desktop

For detailed information on sending messages using AccuRoute Desktop, consult the user guide located at: http://www.omtool.com/documentation/Accuroute/v22/AccurouteDesktop/AccuRouteDesktopV22UserGuide.pdf

To send a message to Ringtail Legal using AccuRoute Desktop:

 Start AccuRoute Desktop. Click START, go to the Omtool programs group, and select AccuRoute DESKTOP. Log in if prompted. The application appears on your desktop.

- 2 Select the destination type **RINGTAIL** in the **RECIPIENTS TYPE** list. The only available file format is TIFF (image)
- 3 Click **ADD**. The Options window appears and displays the Litigation Support tab.

4 In the CASE section, select an available case from the drop-down list and select either DOCUMENT SEPARATOR OF END OF LOAD FILE.

DOCUMENT SEPARATOR - This option generates a Routing Sheet that indicates the presence of a document. A document separator Routing Sheet must be placed in front of any document destined for Ringtail Legal.

END OF LOAD FILE - This option generates a Routing Sheet indicating that this message is the end of the case file upload. The end of load file Routing Sheet tells the Omtool server to finalize the load files and copy them from the working folder to the final folder.

The **Retain Routing Sheet in delivered document** option is automatically selected for an end of load file Routing Sheet.

When you select **END OF LOAD FILE**, you can not click **SEND** to send the message. You must send end of load file Routing Sheets through the standard network scanning process. If you have questions regarding the standard network scanning process, contact your network administrator.

5 In the OPTIONS section, select GENERATE OCR TEXT (optional). Selecting this option will create OCR text files in addition to the single page TIF files. OCR text files are searchable when imported into Ringtail Legal. If this option is not selected, only the single page TIF files are created, and the document is not searchable within Ringtail Legal.

Continued: Sending a message to Ringtail Legal using AccuRoute Desktop

6 In the OPTIONS section, select the destination folder from the drop-down list.

7 In the **DOCUMENT ID** section, enter a **STARTING NUMBER** or accept the default of 1.

> In most cases, documents will be numbered starting with the specified number. If there is a document with a higher number already referenced in the load file, however, the starting number will begin at the next highest number.

> The starting number field is added to the file name during the Compose process. For example, if Width is set to six, the resulting file name will be 000001.tif. The starting number (in this example 000001) indicates the first individual file number of the single page files.

8 Click the CODING FIELDS tab (this is defined by your network administrator). All fields may not be available.

9 Enter information for any custom user-defined fields. If a field is required, you must enter information for that field. There are five different types of data fields, see your network administrator if you have any questions. 2

String - If a custom user-defined field is defined as a string value field, you can enter alpha or numeric text.

Custom Fields				
Document Title				
Document Description				
Document Type				
Personal injury				
12/12/2006				

Number - If a custom user-defined field is defined as a number field, you can only enter whole numbers.

Custom Fields					
Title	Document Title				
Description	Document Description				
Document Type	Document Type				
Type of Litigation	Personal injury				
Department Code	250				
Active Case?					
Trial Date	12/12/2006				
Attorney Name					

Boolean - If a custom user-defined field is defined as a boolean field, select the check box if the answer is true, and clear the check box if the answer is false.

12 Do any of the following:

Send the message immediately - Click **SEND** on the toolbar. A message box indicates that your message has been sent to the server. (Your message must have at least one attachment.)

Save the message as an Embedded Directive -Click SAVE ED on the toolbar, type a title for the Embedded Directive, and click SAVE.

Print a Routing Sheet that can be scanned with hard copy documents - Save the message as an Embedded Directive. Then click **PRINT RS** on the toolbar. AccuRoute Desktop creates a Routing Sheet containing the Embedded Directive and displays it as a PDF file on your desktop. Print the Routing Sheet and
